NOTES:

1. Streetparking in Ambleside require display of a SLDC (South Lakeland District Council) time/clock disk in the windscreen. We have 50 such parking disk clocks to distribute at the start of the day, but others can be obtained at nearby shops.
2. Travel times given on timetable are basic driving time with no delays. The Timetables have been planned with a small amount of extra time built-in for minor delays and time needed to park, but you may want to allow some extra time between towers.
3. The timetable has been planned so that a ringer should be able to ring to end of session at any church and can still manage to get to the last 15 minutes of the next tower, even for those towers with a shorter (45 minute) session. The final two columns suggest the latest departure time to have chance of arriving at start of next session, or last 15 minutes of next session
